At the solicitation of several property-holders, the city authorities, only a few short years ago, built a mag ainfoent sewer, extending 800 refet West of Schults street. It was then the purpose to have all occupants along its line tap it and run their kitches slops, &c., into it. Now, however, the city is huild lags aguter so these slope can be run on the uurface. A Big Wheat Crop For 1899.

That's our prediction for Mason, Bracken and Robertson counties. We make no pretenions in the way of fortune teiling; neither are we a prophet. We are simply gifted with a goodly amount of "horse sense." We know that there will be a good wheat crop next year, because the buik of the wheat sown this fail will be sown with Empire Dils are positive and absolute. They do exactly what you tell them to do. The Empire Dils Drill is the only positive feed drill made. It will feed the same quantity of wheat, trye, oats or barley with the same gern. Size of the grain cuts no figure with the Empire. You do not have to sow four or five acree before you know what you are doing as with other drills. The Empire has telescoping steel conductors which never break or choke up as do the old-fashioned rubber conductors. The Empire drag bars are fastened to the top of the boot, five luches higher than on other drills and trash will not choke and stop the Empire.

EMPIRE WHEAT

will drill coru successfully. Remember, the Empire is a positive feed drill, and the only one on the market. The grain is gently lifted into the conductors by a round, sancer-shaped part which is made to rotate by a square shaft. Only so much grain can be lifted and fed as this part will hold, and in order to sow a large or small quantity of grain per acre you simply put a large or small equivalent to the shaft, which makes the round, sancer-shaped lift revolve faster or slower. Each cog wheel is unmbered and guaranteed to sow an exact quantity of any grain per acre—wheat, rye, oats, barley. The Empire has tapering aske like at himble-skelu wagon, and a peculiar wheel, a wheel that we will guarantee will not rub the boxes in the years as on other drills—no, on it is twenty-drey pears. Buy the best. Buy the Empire and take advantage of 48 years experience. The Empire Dise brill. Ask your grandfather about it. Ask any old citizen if he ever heard of an Empire brill. I can show you an Empire brill that is 21 years old and still running. The Empire for 48 years had a National reputation—thow and nest the world over except liason county. The Empire is not a cheap drill. It costs the agent a little more than other drills. Perhaps that is why your implement ideniers have never sold the Kupire brill here. Empire Drill are being exhibited and sold in Mason county now. I have shown this drill to at least 80 farmers in the last two weeks and every one is enthussiated in the praise. Call, examine this wonderful machine and convince yourself. It is a pleasure for us to exhibit it. Call and see us.

"As you doubtless know, I was opposed to the war programme. But, having begun the war, we should have conducted it in such a way as to have conducted it in such a way as to have rortested our own soldlers:

Mr. Sherman said that the president, he said, had been diligent, active and patroic in the conduct of the war, cross withheld its harsh declaration, the said, had been diligent, active and patroic in the conduct of the war, cross withheld its harsh declaration, the president and the state department would have secured by negrotations with Spain the substantial independence of Cuba.

When asked as to the course that should be pursued in order to get at the truth, Mr. Sherman said: "The president has power to order an investigation, which can be conducted by a board of inquiry, to be appointed by him. Such a board would not have executive powers, and its findings would have a moral, rather than a judicial inluence.
